Alyth substation finishing touches and demobilisation.

The finishing touches of the substation works are nearing completion with the sowing of the landscaped areas with wildflower seed mixes being a success due to the warm and wet weather conditions.

Demobilisation of the site welfare is planned for late July 2024, leaving the site fully operational.

The Osprey camera platform will remain operational for the foreseeable future, with funding agreed by SSEN Transmission projects for the next few years.

If you have any questions, please do not hesitate to contact your Community Liaison Manager:

What's next

In the coming months, there will be routine maintenance and inspection of equipment and landscaped areas on the site by our operations teams and contractors.

The tree planting around the site is planned for Autumn 2024.

SSEN Transmission is preparing for the next phase of upgrading the Alyth substation to a 400kV voltage level, set to commence in Q3 2025.
