1	Canmore ID 70368 NJ05SE0016	305160	850220	Farmstead	Undesignated	Sleughwhite	Remains of a farmstead, comprising three buildings which lie 350m NW of the abandoned steading of Sleughwhite in an area of impenetrable gorse and whin. Depicted on the 1st and 2nd edition OS maps as incomplete structures.	Post-Medieval	Low
2	Canmore ID 70367 NJ05SE00015	306033	850093	Farmstead	Undesignated	Muckle Greens	Remains of a cottage, depicted on the 1st and 2nd edition OS maps. It survives as a roofless shell of a gabled cottage together with an outbuilding whose walls stand to 0.7m high. Recorded by the Royal Commission, 21 June 1991.	Post-Medieval	Low
3	Canmore ID 15595 NJ04NE0026	305410	849930	Farmstead	Undesignated	Sleughwhite	The remains of the farmstead of Sleughwhite stand in the middle of a field. It is depicted on the OS map of 1846 as an L-shaped steading with a rectangular building to the east. By the 1888 edition, another building with an attached enclosure had been added.	Post-Medieval	Low
4	NJ04NW0101	304242	849923	Gravel Pit	Undesignated	Greens	Site of a gravel pit depicted on the 2nd edition OS map of 1902, and named as an 'Old Gravel Pit' although not shown on the 1st edition.	Post-Medieval	Low
5	NJ04NW0102	304111	849726	Gravel Pit	Undesignated	Greens	Site of a gravel pit depicted on the 2nd edition OS map of 1902, and named as an 'Old Gravel Pit' although not shown on the 1st edition.	Post-Medieval	Low
6	NJ04NW0021	303763	849530	Hillock	Undesignated	Fairy Hillocks	Natural hillock with intangible heritage value. In this case, a post-medieval date has been tentatively applied as the earliest likely date that the current place name was applied, reflecting the earliest probable dates for the associated beliefs about these locations emerging.	Post-Medieval	Low
7	Canmore ID 116901	303700	849410	Farmstead	Undesignated	Wester Greens	Farmstead still in use that is depicted on the 1846 1st edition OS map. It shows a T-shaped farmhouse with	Post-Medieval	Low

	NJ04NW0062						attached rectangular garden, a U-shaped range of steadings, a small rectangular building and a mill pond with a lade running to the north side of the structure.		
8	Canmore ID 70326 NJ04NW0036	303550	849060	Building	Undesignated	Greenswale Burn	On the west bank of the burn are the footings of a three-compartment building, depicted on the 1st and 2nd edition OS maps as a ruin; to the S are the mutilated remains of a further structure.	Post-Medieval	Low
9	Canmore ID 70327 NJ04NW0037	303380	848746	Farmstead	Undesignated	Glaschyle	There are the footings of three buildings and an enclosure to the NNE of the farmstead named Glaschyle (NGR NJ 0331 4858) on the first edition of the OS 6-inch map (Elginshire, 1874, Sheet xx) and described in the ONB as 'a small dwelling house with offices, garden attached' (Name Book 1874). The enclosure and one roofed building are shown on a 1781 survey of part of the estate of Dunphail by Hugh Kinnaird (SRO, RHP 14308).	Post-Medieval	Low
10	Canmore ID 70328 NJ04NW0038	303312	848573	Farmstead, Kiln Barn	Undesignated	Glaschyle	This farmstead comprises an enclosure and two buildings, now reduced to footings, but shown roofed on the first edition of the OS 6-inch map (Elginshire, 1874, Sheet xx). Fragments of what may be a kiln-barn lie some 10m to the NNE of the buildings. One building is shown at this location on a 1781 survey of part of the estate of Dunphail by Hugh Kinnaird (SRO, RHP 14308).	Post-Medieval	Low
11	NJ04NW0058	304752	848558	Milestone	Undesignated	Hill Of Glaschyle	A milestone is depicted at this location on the OS maps of 1846 and 1888. It marks 8 miles to Forres. It is unknown if it still stands.	Post-Medieval	Low

12	Canmore ID 70329 NJ04NW0039	303104	848400	Building	Undesignated	Woodside Of Glasfield	The remains of a building, still standing to wallhead height, lie on the edge of an area of woodland. There is an outshot to the north-northeast and an enclosure to the south-southeast. It is depicted on 1st and 2nd edition OS maps as rectangular building double the length of the ruins which are depicted on the current edition (2006). The remains were recorded by Highland Archaeology in 2012 as part of a walkover survey ahead of a proposed windfarm. The ruins then visible comprised about half the length of the building shown on the 2nd edition OS map. The north end largely stands to wall-head height the southern gable has been removed.	Post-Medieval	Low
13	Canmore ID 15745 NJ04NW0011	303131	848128	Hut Circle	Undesignated	Sneishin Hill Hut Circle	A hut circle associated with the Sneishin Hill field system, possible of Bronze Age/Iron Age date. The survey recorded the hut-circle as having an external diameter of 15-16 m and internal diameter of 11-12 m, with wall footings up to 0.5 m high and spread between 2 and 3 m. There is some damage from forestry ploughing on the south side.	Prehistoric	Low
14	NJ04NW0063	304954	847890	Mill Dam, Lade	Undesignated	Johnstripe	Site of a now destroyed mill dam and lade that is depicted on both the 1846 1st edition and the 1888 2nd edition OS maps. On the 1846 map the lade is shown as running to the U-shaped steading range of Johnstripe. To the south is a rectangular building set within a subrectangular enclosure. By 1888 that building has gone and the steadings are reduced in size to a L-shaped building.	Post-Medieval	Low
15	NJ04NW0011	303119	847879	Hut Circle, Field System	Undesignated	Sneishin Hill	A hut-circle and associated field system, possibly of Bronze Age/Iron Age date. A stone-walled oval hut, c14m E/W by c12.5m N/S, lies on the N edge of a contemporary field system. The wall is cut in the west and south by a drain which has exposed the rubble core. The entrance in the east is ill-defined and is also mutilated by the drain. Plots are ill-defined but stone clearance heaps, lynchets and field walls are evident.	Prehistoric	Low

							An extensive scatter of small cairns measuring up to 8 m in diameter and 0.5 m in height, occupy the summit and the north, west and south flanks of the hill.		
16	Canmore ID 70356 NJ04NE0016	306140	847870	Building	Undesignated	Tomechole	Remains of a small building depicted on the 1st edition OS map with an enclosure attached to its north face. On the 2nd and current (2006) editions, it is shown as incomplete. Now visible as grass-grown footings with a spread of field-gathered stones to the NE.	Post-Medieval	Low
17	Canmore ID 348362	303353	847823	Peat Cutting, Quarry, Shooting Stands	Undesignated	Hill Of Glaschyle	Various post-medieval buildings and boundary stones, as well as prehistoric roundhouses and field systems had been previously identified within the area. These were visited and recorded. Newly identified and recorded features included a modern quarry, peat cuttings and 20th century shooting butts.	Prehistoric, Post-Medieval (20th Century)	Low
18	NJ04NE0025	305103	847805	Croft	Undesignated	Johnstripe	Remains of a small rectangular croft set within two rectangular enclosures are depicted on the 1888 2nd edition OS map. Not depicted on the current edition (2006).	Post-Medieval	Low
19	NJ04NW0067	303769	847530	Boundary Stones	Undesignated	Chapelhill	Two boundary stones depicted on the OS 1st and 2nd edition maps, one at NJ0376947530, the other to the southwest at NJ0346447159. Field visit by Highland Archaeology in 2012 (part of a walkover survey ahead of a proposed windfarm) located one stone at NJ0376547527. It is a rough rounded boulder incised with the letter D facing west. It measures approximately 30 x 30 x 30 cm above ground.	Post-Medieval	Low
20	Canmore ID 15743 NJ04NW0009	304040	847480	Cairn	Undesignated	Moss Of Faebuie	At NJ 0404 4748 on a false crest near the N edge of a field system (NJ04NW 12), is a circular grass-covered stony mound c 11.5m in diameter and c 0.5m high which has been partly robbed. Its size and situation suggest that it is a cairn rather than a large stone clearance heap.	Prehistoric	Low

21	Canmore ID 15744 NJ04NW0010	304160	847400	Hut Circle, Field System	Undesignated	Moss Of Faebuie/Meikle Corshellach	Remains of hut and field system. Hut visible as a platform bounded by a pronounced back scarp in northwest and elsewhere as a turf-covered bank spread to circa 2.5 m in which little stone is visible, entrance not apparent. Contemporary field system with stone clearance heaps, lynchets and occasional field walls. Visited by RCAHMS on 29 July 1991 when most of the southeast facing slopes had been afforested. The hut-circle and field-system could not be located. Several small cairns were noted at the edges of the trees to the southwest of Meikle Corshellach and further cairns were visible in the forest ride in the vicinity of NJ04NW0009.	Prehistoric	Low
22	Canmore ID 142742 NJ04NW0052	304410	847330	Farmstead	Undesignated	Meikle Corshellach	Remains of a farmstead, depicted on the 1st edition OS map of 1867 as a U-shaped steading open to the southeast with a small farmhouse with attached garden enclosure to the west. On the 2nd edition of 1888, both buildings are shown as incomplete.	Post- Medieval	Low
23	Canmore ID 70319 NJ04NW0029	304300	847300	Buildings	Undesignated	Meikle Corshellach	Footings of two buildings, one attached to an enclosure to W of the sheepfold at Meikle Corshellach. A range of buildings also stood on site of sheepfold of which only fragmentary traces may be seen.	Unknown	Low
24	Canmore ID 70321 NJ04NW0031	303500	847280	Buildings, Enclosure	Undesignated	Moss Of Faebuie	The footings of two buildings, one attached to an enclosure and depicted on the 1st and 2nd edition OS maps, are situated amongst self-seeded trees to the SW of the Moss of Faebuie.	Post- Medieval	Low
25	Canmore ID 70340 NJ04NE0001	306312	847223	Building, Enclosure	Undesignated	Rochuln	Drystone footings of a building and adjacent enclosure are situated on a slight knoll to the northeast of Rochuln farmstead. About two thirds of a horse-gang survives as a platform on the west side of the presently roofed cottage. Depicted on the 1st edition OS map as intact, but on the 2nd and current (2006) editions as incomplete. Recorded by the Royal Commission, 2nd July 1991.	Post- Medieval	Low

26	NJ04NW0100	304340	847134	Milestone	Undesignated	Meikle Corshellach	Site of a roadside milestone depicted on the 1st and 2nd edition OS maps showing 'Forres 9'. It is depicted on the current edition (2006).	Post-Medieval	Low
27	Canmore ID 320932	304211	847085	Cairn	Undesignated	Meikle Corshellach	A large cairn (left in situ) at the southern end of the cable route and seems to be the only trace of a previously recorded field system (NJ04NW0100), which appears to have been destroyed by afforestation.	Prehistoric	Low
28	Canmore ID 70318 NJ04NW0028	304330	846980	Kiln Barn	Undesignated	Stripe Of Corshellach	Remains of Kiln-barn, set into SE facing slope with kiln-bowl on the downslope side. It measures 9.2m from WNW to ESE by 3m within a stony bank spread to 1.5m in breadth and 0.4m in height. The bowl measures 2.5m in diameter. In the field to the SE are parallel rickles of stone, oriented from northwest to southeast, which are probably stone field-drains.	Post-Medieval	Low
29	Canmore ID 69337 NJ04NW0019	304158	846879	Dyke	Undesignated	Little Corshellach	Turf dyke, with stones visible in base. It is c.1m wide at base narrowing towards top, and 0.70m high.	Post-Medieval	Low
30	Canmore ID 69335 NJ04NW0017	304000	846800	Hut Circle	Undesignated	Little Corshellach	Hut - heather-covered footings of a rectangular stone-walled hut, 6m by 3m; possible entry on S side; possible field system to north of track. Visited by RCM 29 July 1991; an irregular heap of vegetation-free stones within which may be fragmentary structures.	Prehistoric	Low
31	Canmore ID 69336	304070	846720	Oval Hut	Undesignated	Little Corshellach	A small oval hut is set on level ground on the NE side of the track to Tomcork. It measures 4.6m from NNE to SSW by 3.4m transversely over a fragmentary bank about 0.8m thick and 0.3m in height. The interior is slightly dished and an external drain runs NNE to ESE. There is an irregular face around the WSW and the SSW side is slightly flattened.	Prehistoric	Low

32	Canmore ID 70339 NJ04NW0045	304250	846720	Rectangular feature	Undesignated	Little Corshellach	Preserved in a clearing of recently planted trees is an irregular subrectangular feature. It comprises of a slight depression bounded by a fragmentary stony bank spread to 2.1m in width and 0.3m in height at the centre but much slighter at each end.	Unknown	Low
33	NJ04NW0018	304088	846700	Cairn	Undesignated	Little Corshellach	Possible kerb cairn or robbed stone clearance heaps - heather covered cairn is 4m by 3m and stands 0.34m high. Visited by RCM 29 July 1991; a small oval hut is set on level ground on NE side of the track; measures 4.6m from NNE to SSW by 3.4m ansversely over a fragmentary bank about 0.8m thick and 0.3m in height. The interior is slightly dished and an external drain runs north-northeast to east-southeast. There is an irregular face around the west-southwest and the south-southwest side is slightly flattened.	Prehistoric	Low
34	Walkover	304491	847827	Peat Cutting	Undesignated	Peat Cutting	The evidence for peat cutting is seen as a 5m long scar where earth was removed.	Post-Medieval	Low
35	Walkover	304957	847949	Dam	Undesignated	Mill Dam	An old mill dam, used by the Johnstripe farmstead and seen on the 1st edition OS map. The dam measures 5m and stretches over a lade.	Post-Medieval	Low
36	Walkover	304956	847995	Dam	Undesignated	Dam	This dam sits on the same lade as HA35 . It is likely to be contemporary with the Johnstripe farmstead to the south.	Post-Medieval	Low
