

VOLUME 2 – MAIN REPORT

1.	Introduction	2.10	Use of Natural Resources
1.1	Overview of the Proposed Development	2.11	Residues and Emissions
1.2	Project Need	2.12	Disaster Resilience
1.3	Background of Proposed Development	2.13	Decommissioning
1.4	Legislative Requirements	3.	Consideration of Alternatives
1.5	Sustainability Strategy	3.1	Introduction
1.6	Biodiversity Net Gain	3.2	Key Policy Considerations
1.7	Purpose of the EIA Report	3.3	Design Alternatives
1.8	EIA Report Structure	3.4	Summary
1.9	Notifications	4.	EIA Consultation and Scope
2.	Description of Proposed Development	4.1	Introduction
2.1	Introduction	4.2	Stakeholder Consultation
2.2	The Location of the Proposed Development	4.3	EIA Scoping
2.3	Characteristics of the Proposed Development	4.4	Topics Scoped out of the EIA
2.4	Construction Activities and Phasing	4.5	Technical Consultation
2.5	Construction Employment and Hours of Work	4.6	Key Environmental Issues Raised During Consultation (May 2022)
2.6	Construction Traffic and Plant	5.	Methodology
2.7	Standard Mitigation and Working Methods during Construction	5.1	Introduction
2.8	Mitigation through Design	5.2	EIA Regulations, Guidance and Planning Policy
2.9	Operation Management and Maintenance	5.3	EIA Quality
		5.4	Identification of Baseline Conditions
		5.5	Assessment of Likely Significant Effects

5.6	Identification of Mitigation Measures	7.8	Summary
5.7	Cumulative Effects	8.	Ecology
5.8	Assumptions and Limitations	8.1	Introduction
5.9	Co-ordinated Assessment with Habitat Regulations Appraisal (HRA)	8.2	Assessment Methodology and Significance Criteria
6.	Seascape, Landscape and Visual	8.3	Baseline Conditions
6.1	Introduction	8.4	Assessment of Potential Effects
6.2	Assessment Methodology and Significance Criteria	8.5	Mitigation
6.3	Baseline Conditions	8.6	Residual Effects
6.4	Assessment of Potential Effects	8.7	Cumulative Effects
6.5	Mitigation	8.8	Summary
6.6	Residual Effects	9.	Ornithology
6.7	Cumulative Effects	9.1	Introduction
6.8	Summary	9.2	Assessment Methodology and Significance Criteria
7.	Cultural Heritage and Archaeology	9.3	Baseline Conditions
7.1	Introduction	9.4	Assessment of Potential Effects
7.2	Assessment Methodology and Significance Criteria	9.5	Mitigation
7.3	Baseline Conditions	9.6	Residual Effects
7.4	Assessment of Potential Effects	9.7	Cumulative Effects
7.5	Mitigation	9.8	Summary
7.6	Residual Effects	10.	Geology and Soils
7.7	Cumulative Effects	10.1	Introduction
		10.2	Assessment Methodology and Significance Criteria

10.3	Baseline Conditions	12.8	Summary
10.4	Assessment of Potential Effects		
10.5	Mitigation	13. Noise	
10.6	Residual Effects	13.1	Introduction
10.7	Cumulative Effects	13.2	Assessment Methodology and Significance Criteria
10.8	Summary	13.3	Baseline Conditions
11. Water Environment		13.4	Assessment of Potential Effects
11.1	Introduction	13.5	Mitigation
11.2	Assessment Methodology and Significance Criteria	13.6	Residual Effects
11.3	Baseline Conditions	13.7	Cumulative Effects
11.4	Assessment of Potential Effects	13.8	Summary
11.5	Mitigation	14. Forestry	
11.6	Residual Effects	14.1	Introduction
11.7	Cumulative Effects	14.2	Assessment Methodology and Significance Criteria
11.8	Summary	14.3	Baseline Conditions
12. Traffic and Transport		14.4	Assessment of Potential Effects
12.1	Introduction	14.5	Mitigation
12.2	Assessment Methodology and Significance Criteria	14.6	Residual Effects
12.3	Baseline Conditions	14.7	Cumulative Effects
12.4	Assessment of Potential Effects	14.8	Summary
12.5	Mitigation	15. Cumulative Effects	
12.6	Residual Effects	15.1	Introduction
12.7	Cumulative Effects	15.2	In-Combination Effects

15.3 Effect Interactions (Intra-cumulative)

16 Schedule of Environmental Mitigation

16.1 Introduction
