

Errochty GSP Newsletter

June 2024

Construction works continue at SSEN Transmission's Errochty substation in Tummel Bridge.

The works will see the existing site be extended to facilitate the installation of two new 90MVA 33/132kV transformers along with appropriate 132kV and 33kV switchgear to create a new Grid Supply Point (GSP).

This new Errochty GSP will provide a 33kV connection point, to accommodate all generation and demand currently served by Tummel Bridge GSP, including the requested capacity increase for Tummel Bridge Hydro Power station.

Works carried out to date

- Installation of welfare cabins and office space.
- Phase 1 earthworks completed, approx. 70% of the switching station extension was reduced by 1.2m and built-up using stone to create a stable and level working platform.
- Works commenced with the west (GT3) bund, excavation of the bund completed, a concrete working platform created, steel and formwork currently ongoing.
- Works commenced with the excavation of the East (GT4) bund.

The project has a dedicated website, please scan the QR code to be taken to the project website or use the following URL:
ssen-transmission.co.uk/errochty

Planned works: Quarter 3 2024

- Completion of the west (GT3) bund – June/July
- Phase 2 earthworks - July
- Completion of the east (GT4) bund – August
- Grid transformer 3 and grid transformer 4 delivery – September
- Commencement of the 33kV switchgear building – August/September
- Commencement of primary plant foundations – August/September
