

- Planning Application Boundary
 - Electrical layout
- NatureScot (2016) Carbon and Peatland Map**
- Class 0 - Mineral soil - Peatland habitats are not typically found on such soils
 - Class 3 - Dominant vegetation cover is not priority peatland habitat but is associated with wet and acidic type. Occasional peatland habitats can be found. Most soils are carbon-rich soils, with some areas of deep peat
 - Class 4 - Area unlikely to be associated with peatland habitats or wet and acidic type. Area unlikely to include carbon-rich soils
 - Class 5 - Soil information takes precedence over vegetation data. No peatland habitat recorded. May also include areas of bare soil. Soils are carbon-rich and deep peat.
