

Lochay Transformer Replacement Newsletter

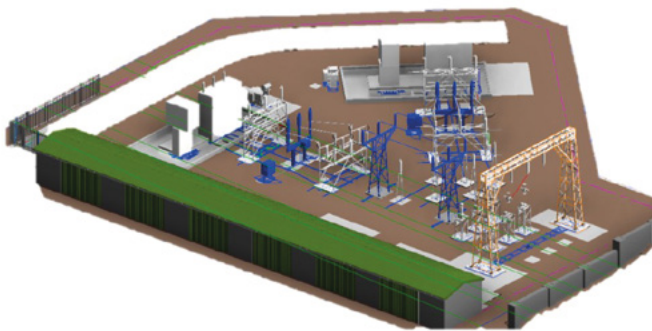

April 2024

The project has a dedicated website, please scan the above QR code to be taken to the project website or use the following URL:
ssen-transmission.co.uk/lochay

SSEN Transmission's 132kV transformer replacement project adjacent to Lochay Power Station involves the construction of a new substation compound, including building to house indoor equipment.

Safety is always our first priority at SSEN Transmission and with this in mind, we ask that you please remain vigilant of signage or direction around the construction works and do not enter our working areas.

If you have any questions, please do not hesitate to contact our Community Liaison Manager:

Louise Anderson Lead Community Liaison Manager

Progress on site

We have made very good progress since December 2023. The site has been fully excavated, Gabion basket retaining walls erected, numerous equipment bases, including the larger bases for the new transformers have been constructed, also visible is the large excavation for the basement of the new control building.

Upcoming works

The concrete bases for the outdoor electrical plant will be completed in April 2024.

The construction of the building will continue with foundation and perimeter walls completed in May 2024 with structural steelwork being erected in July 2024.
