Meet the Buyer Event

Lochay Transformer Replacement Project

Scottish & Southern Electricity Networks Transmission (SSEN Transmission) will shortly be beginning construction works replacing the existing 132/11kV transformers currently situated at Lochay Power Station in the Killin area. As part of this project, we are welcoming local businesses to register an interest in an upcoming opportunity to engage with our Contractors Balfour Beatty and Global to exchange details to further discuss out with this introduction the possible business opportunities for the local supply chain that may be available.

This project has the potential to create local business opportunities in the following fields; accommodation, security, catering, cleaning services, aggregate services, local labour services, road gritting, building and wholesaler merchants and others. We would encourage any local businesses to attend the session and discuss what possible business opportunities there are with our Principal Contractor.

If you would like to register your interest in attending our Meet the Buyer event which we anticipate to hold on **7 December 2022**, please contact our Lead Community Liaison Manager:

Louise Anderson
