Strategic Spares Warehouses - Inverness

Virtual Consultation

SSEN Transmission invites you to come and share your views with us

SSEN Transmission has a need for improved materials management and warehousing capabilities. This relates to the need to improve overall electricity network infrastructure performance through reliability, availability and maintainability of asset and spares' inventory, and as such we are taking forward plans to construct a strategic spares warehouse in the Inverness area. This event will provide further details on the need for the warehouse and present our proposed location.

The virtual consultation events have been designed to be as interactive as face to face events, allowing for presentation of key project information and plans, as well as providing an opportunity to ask questions about the project. Visitors will be able to engage directly with the project team, via a live text chat function, where they can ask any questions they might have about the project and share their feedback on the current proposals.

The team will be available for live text chat sessions on:

10 August 2021

1.00pm – 3.00pm

5.00pm – 7.00pm

To find out how you can join the interactive virtual consultation visit the project website by scanning the below QR code
